Dear Paula,

According to our last conversation I am sending you the short description about Alpha Info doo.

The company was controlled by the tax authorities in the year of 2020. The whole controll finished on 2nd of november 2021, when I visited the Tax aauthoroties office in Zagreb with my accountant.

I was told by the representative officer that the company has to pay 15% extra tax which I didn't calculate with during the company's trade activities earlier, since it wasn't obvious even for my accountant.

The extra tax made the whole operation undoable. I tried to negotiate with Alpha Info partners in a hope of beneficial solution, in a hope of a price recalculation, but none could accept the updated version.

Since the new situation destroyed the business future, - the close future at least - the company paused the operation right away.

I wanted to reach my long term business target, which was a very unique online platform assisting tourism i Croatia, but with this huge dept caused by the tax I didn't calculate with cannot let it happen.

You also asked my accountant phone number, I am sharing it with you, but she is out of office for while because of a personal (health relevant) issue.

Her name is Iris Kovac, and the number is +385 91 330 3796

All bests to you,

Akos Farkas
