the β phase of the polymer. The β phase is the more ordered phase and is characterized by a higher density and a higher melting point than the α phase. The β phase is the more stable phase and is the one that is most commonly observed in nature. The α phase is the less ordered phase and is characterized by a lower density and a lower melting point than the β phase. The α phase is the less stable phase and is the one that is most commonly observed in nature.

... and the β parameter is the inverse of the variance of the error term. The β parameter is estimated by the following equation:
