Description:**Basic engine particulars:**

Two-stroke diesel engine, crosshead type, slow speed, long stroke, direct reversible, constant pressure turbocharged of IMO Tier II emission type with direct fuel injection shall be offered for the intended purpose, with high efficiency turbocharger and part load exhaust gas bypass (EGB) tuning.

The engine to burn HFO, MDO or MGO with characteristics specified herebelow.

The engine is direct coupled to the single fixed pitch propeller plant

Gallery and platforms around the engine shall be provided. Final location will be defined later.

Automation, instrumentation and control:

Monitoring panel, local monitoring instruments (manometers, thermometers etc.); sensors for alarming, indication and safety; wiring up to terminal boxes shall be provided according to Class requirements and maker's standard.

The sensors/switches for safety, alarm and monitoring functions shall be wired up to terminal boxes on the engine.

All manometers shall be of shock resistant type equipped with dampers and test valves.

All thermometers shall be with protecting wells and of antivibration type.
