General Terms and Conditions for Sales of Products and Projects

- 1.1 The scope, quantity, quality, functionality and technical specifications of any goods, equipment, documentation, software, work or services to be provided by Guascor Energy (collectively referred to as "**Works**") are exclusively defined as the case may be either in the order confirmation issued by Guascor Energy or the Contract signed by the Customer and Guascor Energy.
- 1.2 The offer letter from the entity of the Guascor Energy group together with these terms and conditions and those other documents expressly identified in the offer letter as forming part of the contract shall together constitute the entire agreement between the parties (the "**Contract**"). Any terms and conditions of the Customer shall apply only where expressly accepted in writing by Guascor Energy.
- 1.3 Guascor Energy is entitled to provide any services part of the Works via a secure remote access ("Remote Services").

The Customer shall verify that the security concept for the remote access proposed by Guascor Energy (see Common Remote Service Platform CRSP – security concept in its current version) is compatible with the technical capability of the Customer and the Customer's safety, cyber security and other requirements. The Customer remains at all times responsible for the safety of humans, machines, and the serviced objects.

The Customer shall grant Guascor Energy access to the serviced objects via remote access. If contractually agreed with the Customer, the Customer shall activate and accept each remote access of Guascor Energy.

The Customer shall provide an internet connection (e.g. broadband cable connection, ISDN connection), which meets the technical requirements for a remote connection. The costs for such internet connection shall be borne by the Customer.

Guascor Energy is entitled to modify or amend the existing security concept, so long as the performance of Works via remote access is not compromised. Prior to implementing an amended security concept, Guascor Energy will inform the Customer of the amended security concept. In the event the implementation is contrary to reasonable interests of the Customer, the Customer shall give written notice to Guascor Energy within 4 weeks after receipt of the notice of the intended change in concept. In the event Guascor Energy and the Customer are unable to agree on the security concept, the Customer is entitled to terminate the Contract in respect of such Works that include Remote Services. In any event Guascor Energy may implement the amended security concept 8 weeks after notifying the Customer.

2. Rights of Use

- 2.1 Except as expressly otherwise agreed in this Contract, as between the parties all intellectual and industrial property rights in the Works, in all documents provided by Guascor Energy in connection with this Contract (the "**Documents**") and in all software, hardware, know how ("**IPR**"), and other things provided with or as part of the Works and the Documents shall be the exclusive property of and vest in Guascor Energy. The Customer shall not reverse engineer, decompile, or reproduce the Works or parts thereof and shall ensure that third parties will not reverse engineer, decompile or reproduce the Works in each case to the extent mandatory law does not prohibit such limitation.
- 2.2 The Customer may use the Documents unmodified and to the extent necessary for operation and routine maintenance of the Works by the Customer's own personnel, unless explicitly agreed otherwise in writing by Guascor Energy.
- 2.3 If the Works include Guascor Energy's software, such software is licensed under the license terms contained in the software documentation, the software itself or in attached license terms (in each case the "**Applicable License Conditions**"), which shall prevail over this Clause 2. The software is issued in object code without source codes. The license hereunder only grants the non-exclusive right to use the software as described in the Applicable License Conditions or, if no such terms are provided, for the purpose of operation and routine maintenance of the Works.
- 2.4 The Works may include third party software. Insofar as specific license terms of the third-party licensor apply, Guascor Energy will provide such terms together with the Works. The Customer shall comply with such third-party license terms.

- 2.5 Insofar as the software contains Open Source Software ("OSS"), Guascor Energy will provide the applicable OSS license terms together with the Works. The OSS license terms shall prevail over this Contract. Details regarding any third-party software and OSS contained in the Works are available in the software documentation (e.g., README_OSS).
- 2.6 The rights granted in Clause 2 shall be transferable to a third party only together with the transfer of ownership of all of the Works to that third party.
- 2.7 Without prejudice to the Customer's intellectual property rights and subject to compliance with applicable law, Guascor Energy and its Affiliates may for its own business purposes collect, use, modify, and copy any data received in connection with the Works.

3. Prices and Terms of Payment

- 3.1 Unless agreed otherwise in writing, prices exclude packing, freight, insurance and any other additional charges (such as storage, inspections by third parties). The price payable by the Customer for the Works under this Contract shall be referred to in this Contract as the "Contract Price".
- 3.2 Unless expressly stated otherwise, if Guascor Energy undertakes any erection, assembly, installation, commissioning or testing of the Works or a part of the Works outside Guascor Energy's own premises ("Works on Site"), the Customer shall bear all incidental costs, such as travel expenses, daily allowances, in addition to the Contract Price.
- 3.3 The Contract Price is exclusive of any indirect taxes (such as property, license, sales, use, value added or similar tax) and/or any duties, customs or public charges related to the Contract. The Customer agrees to pay or to reimburse Guascor Energy for any taxes, customs, duties or other public charges levied on Guascor Energy in relation to the Works. All payments shall be made to Guascor Energy's bank account without deduction (e.g. deduction of withholding tax) within 30 days after issuance of the invoice. If the Customer is required to make a deduction by law, the sum payable shall be increased so that Guascor Energy receives a net amount equal to the amount it would have received without such deduction. The Customer shall provide to Guascor Energy tax receipts from the relevant tax authorities in connection with the payments in due course.
- 3.4 For all payment obligations of the Customer towards Guascor Energy under this Contract, the Customer shall provide Guascor Energy with an irrevocable and unconditional letter of credit (referred to as "L/C") in favor of Guascor Energy, in the amount of all of the Customer's payment obligations, allowing partial and trans-shipments as well as partial drawings, to be opened at the date of Contract signature at the order of the Customer by a first-class international bank acceptable to Guascor Energy. The L/C shall be issued in a form and on terms satisfactory to Guascor Energy and be advised and confirmed by a first class bank of Guascor Energy's choice. The L/C shall be payable at sight and be available at the counters of the advising or confirming bank respectively against presentation of the commercial invoices or advance payment invoices issued by Guascor Energy.

The L/C shall be amended as required to cover any price adjustments. All expenses, commissions and charges arising in connection with the L/C shall be borne by the Customer. The Customer shall indemnify Guascor Energy for any such expenses, commissions and charges deducted by a bank.

If a payment request of Guascor Energy under the L/C is rejected or payment is not received by Guascor Energy within 30 days after the payment request, Guascor Energy may claim payment from the Customer.

The Customer shall ensure that (i) the L/C remains valid and enforceable until all payment obligations towards Guascor Energy have been fulfilled, and (ii) the amount available for drawing under the L/C is at no time less than the amount of all payment obligations of the Customer towards Guascor Energy under this Contract. If the Customer fails to satisfy the before stated obligations, without prejudice to Guascor Energy's other rights and remedies, Guascor Energy is entitled to immediately suspend its performance under this Contract and, if such failure continues for a period of 30 calendar days, to terminate this Contract pursuant to Clause 16 with immediate effect.

- 3.5 Without prejudice to any other rights it may have, Guascor Energy may charge interest at 9 percentage points above the current base lending rate of the European Central Bank on any overdue payments.

3.6 Each party must pay all sums that it owes to the other party under this Contract free and clear without any set-off, counterclaim, deduction or withholding of any kind, save as agreed otherwise in writing or as may be required by law.

4. Delivery Times, Delay and Liquidated Damages

4.1 Any agreed dates for performance of the Works or any part of them shall be extended by a reasonable period of time if and to the extent that Guascor Energy is delayed or impeded in the performance of its obligations by any third party or by the failure of the Customer to perform its obligations. This includes without limitation the delivery of required documents (such as necessary permits and approvals), timely performance of any work to be undertaken by the Customer or any third party appointed by the Customer, and compliance with the terms of payment.

4.2 Guascor Energy may, if it is reasonable to do so, deliver the Works in stages or instalments and shall be entitled to invoice for the Works on a corresponding basis.

4.3 If Guascor Energy does not meet the agreed final delivery or final completion date solely due to the fault of Guascor Energy, the Customer shall be entitled to liquidated damages amounting to 0.5% of the price of the delayed part of the Works, per each completed week of delay, in which the Customer suffered loss as a result of such delay. Liquidated damages payable in case of delay shall be limited to 5% of the price of the delayed part of the Works. In any case the aggregate of liquidated damages payable under this Contract shall not exceed 5% of the total Contract Price.

4.4 Any other liability of Guascor Energy and any claims, rights, and remedies of the Customer in case of delay except as expressly stipulated in this Clause 4 and in Clause 16.2 a) below shall be excluded, to the extent permissible by law.

4.5 If the Customer, the Customer's contractors, or any other third party appointed by the Customer causes a delay to the provision of the Works, the Customer shall reimburse Guascor Energy all reasonable additional costs and expenses incurred due to such delay.

4.6 If the Works fail to meet any guaranteed performance figures in the Contract solely due to the fault of Guascor Energy, Guascor Energy shall be given additional reasonable time to achieve such figures by carrying out at its own expense any work which Guascor Energy considers necessary. If, after completion of the work and all further performance test, the performance figures are not reached, the Customer shall be entitled to liquidated damages at such rate as may be specified in the Contract but which shall in no event exceed 5% of the price of the part of the Works failing to meet the agreed figures. The payment of liquidated damages shall be the Customer's only remedy for and in connection with the non-achievement of the performance figures required under the Contract.

4.7 The Parties acknowledge the worldwide outbreak of the coronavirus disease, which is likely to affect the execution of the Contract. The Parties agree that Guascor Energy shall be entitled to reasonable adjustments of the agreed dates for the performance of the Works, as well as to reimbursement of costs to the extent the delay and the costs are caused directly or indirectly by the outbreak of the coronavirus disease (COVID-19).

5. Transfer of Risk and Title

Risk of damage to or loss of any part of the Works shall pass to the Customer as follows: (i) if the Works do not include full erection and full commissioning upon delivery and (ii) if the Works include full erection and full commissioning upon acceptance as specified in Clause 9.

5.1 The Works shall be deemed delivered if and when the Customer fails to accept delivery without cause. In such case, the Works can be stored and insured at the risk and expense of the Customer and any payment shall become due. The same consequences shall apply on the scheduled date of delivery if the dispatch is postponed for reasons attributable to the Customer.

5.2 Title in any part of the Works shall remain with Guascor Energy until Guascor Energy has received full payment for that part of the Works.

6. Force Majeure

- 6.1 A **"Force Majeure Event"** means any event which is beyond the reasonable control of a party or its subcontractors Guascor Energy, which could not have been prevented by good industry practice and which results in a party, its Affiliates or any of its sub-contractors or sub-suppliers (the **"Affected Party"**) being unable to perform or being delayed in performing in whole or in part its obligations under this Contract. Force Majeure Events include, among others, acts of war, riot, civil commotion, terrorism, natural disaster, epidemic, strikes, lock-outs, attacks on Guascor Energy's IT systems (such as virus attacks, hacker attacks), non-issuance of licenses, permits, or approvals, or any other act or failure to act by any public authority, or embargos or any other trade sanctions imposed by the European Union (EU) or the United States of America (U.S.) or any public authority within EU or U.S. territory or by the United Nations which, upon sole discretion of Guascor Energy, may expose Guascor Energy or any of its Affiliates to sanctions, penalties, loss of privileges or other acts or omissions of public authorities detrimental to Guascor Energy or any of its Affiliates, or any subcontractor or sub-supplier rejecting delivery due to reasons like those as stated herein, acts or omissions of public authorities including any entities acting on their behalf (or threats thereof), or any subcontractor or sub-supplier rejects delivery due to the same reasons.
- 6.2 If a Force Majeure Event occurs, the Affected Party will be deemed not to be in breach of its obligations under the Contract for so long as and to the extent necessary to overcome the effects of the Force Majeure Event.
- 6.3 The Affected Party shall notify the other party as soon as reasonably practicable of the Force Majeure Event and of its affected obligations.
- 6.4 If one or more Force Majeure Events and their effect last for a period of 180 days in aggregate either party may terminate the Contract by giving to the other a written notice of termination with regard to the part of the Works not yet provided. With regard to the part of the Works not yet provided, Guascor Energy shall be entitled to reimbursement from the Customer of its unavoidable costs related to such termination.

7. Obligations of the Customer

- 7.1 The Customer shall apply for and obtain all necessary licenses, permits and approvals required for commissioning, acceptance and use of the Works.
- 7.2 The provision of the Works shall be subject to the Customer providing, at its own expense and in a timely manner, everything reasonably required to ensure that Guascor Energy's personnel are able to commence work in time and to carry out the Works in an uninterrupted manner. For Works on Site, the Customer shall provide, without limitation:
- a) unrestricted access to the site and related infrastructure,
 - b) assistance with regard to obtaining required visas, work and residence permits and customs clearance for the Works, personnel, or equipment of Guascor Energy or its subcontractors,
 - c) all earth-moving and construction work and other ancillary services to the extent not expressly included within Guascor Energy's scope of Works including the necessary works, materials and tools,
 - d) equipment, tools and materials necessary for Guascor Energy's performance of the Works such as scaffolding, lifting equipment etc.,
 - e) energy, water, internet access, heating and lighting,
 - f) suitable, dry and lockable rooms for the storage of materials, tools etc. and adequate working and recreation rooms for personnel of Guascor Energy or its subcontractors, including telephone and communication lines and appropriate sanitary facilities,
 - g) all necessary health and safety measures to protect the personnel and the property of Guascor Energy and its subcontractors,

- h) all necessary information concerning the location of concealed electric power, gas and water lines or of similar installations as well as all required data concerning static and sub-surface conditions of the site, and
- i) all necessary materials and equipment to start Works on Site and make sure that the Works on Site can be started as agreed and carried out without interruption.

7.3 The Customer is solely responsible for the conception, implementation and maintenance of a holistic, state-of-the-art security concept to protect its enterprise, with all plants, systems, machines and networks for which the Works are provided against Cyberthreats. "Cyberthreat" means any circumstance or event with the potential to adversely impact the Customer's plants, systems, machines and networks (including the Works) via unauthorized access, destruction, disclosure and/or modification of information, denial of service attacks or comparable scenarios. Such concept should inter alia include:

a) access to Customer's premises and to its plants, systems, machines and networks must be restricted to where absolutely necessary;

b) installation of Updates as soon as they are available in accordance with the installation instructions given by Guascor Energy and using the latest version. This might require Customer's purchase of upgrades of hardware and software, and patch management services but subject to a prior check of the compatibility and to the impact on the functionality of the whole plant or system. Use of versions that are no longer supported and/or failure to install the latest Updates may increase Customer's exposure to Cyberthreats. "Update" means any software which primarily contains Bug Fix, Patches and/or minor enhancements or improvements of the Product, but does not contain significant new features;

c) complying with security advisories, implementing other related measures.

d) regular vulnerability scanning and testing of the hardware and/or software of the Works and related services, provided however, that (i) it is not performed while the components are in use, and (ii) the system configuration and security level of any parts of the components are not modified. If vulnerabilities are identified by the Customer, the Customer shall notify Guascor Energy in writing within a reasonable time. Customer shall cooperate with Guascor Energy, and must not disclose the vulnerability without the prior written consent from Guascor Energy;

e) implementing and maintaining a state-of-the-art password policy;

f) connecting the plants, systems, machines and networks, for which the Works are provided to an enterprise network or the internet must only be done where absolutely necessary and only when appropriate security measures (e.g. firewalls, network client authentication and/or network segmentation) are in place and the guidelines of the respective manufacturers are fulfilled;

g) minimizing the risk of a malware infection (e.g. through contents of USB-storage media and other connected removable storage devices through malware scanners with approved compatibility by the manufacturer or other appropriate protective measures; and

h) raising the awareness of the Customer's personnel towards dangers associated with cyber threats. This also includes regular trainings.

7.4 The Customer acknowledges that Works on Site may generate and/or uncover hazardous waste which is subject to specific legal or regulatory requirements under applicable laws "hazardous materials" or "hazardous waste".

If Guascor Energy discovers hazardous materials (including asbestos), environmentally hazardous substances, geological or geothermal conditions, archaeological findings or any other local environmental conditions which have an adverse effect on the Works, the Customer shall be liable for any required remediation and shall also reimburse Guascor Energy for any reasonable additional costs and expenses. The Customer shall, at its expense, provide containers complying with all legal and regulatory requirements and shall handle, store and dispose of hazardous waste in accordance with the applicable laws.

7.5 The Customer shall be responsible for the collection and disposal of the waste electrical and electronic equipment and industrial batteries at the end of their use phase at its own expense according to the law at the place of use.

- 7.6 Guascor Energy shall comply with the Customer's site rules and regulations when performing Works on Site, provided that the Customer informs Guascor Energy, in writing, of all relevant site rules and regulations in force at the premises within a reasonable period of time prior to performance of the Works on Site.

Guascor Energy shall not be obliged to provide the Works on Site in unhealthy or dangerous surroundings. All the necessary safety and precautionary measures shall be taken by the Customer, at no cost to Guascor Energy, before the Works on Site commence and shall be maintained by the Customer during Guascor Energy's performance of the Works on Site.

The Customer shall inform Guascor Energy prior to the execution of any Works on Site about potential health or safety risks which may originate from the Customer's plant or equipment or may exist at Customer's site, including but not limited to hazardous materials which may exist in addition to those already specifically addressed in the Contract or which may be generated or released in the course of the Works on Site ("**HS Risk**").

If a potential HS Risk arises, then, without limiting its other rights and remedies, Guascor Energy may suspend its work until the respective HS Risk has been permanently eliminated, or protective and preventive measures required by Guascor Energy have been taken by the Customer.

The Customer shall reimburse Guascor Energy all additional costs incurred by any special protective and preventive measures as deemed necessary by Guascor Energy to deal with the existing HS Risk as well as costs resulting from the suspension. The contractual schedules, agreed dates, and other time limits shall be adjusted accordingly.

The Customer is responsible for the health and safety conditions on site, shall comply with any applicable laws as well as the laws, regulations and requirements of the European Union, and shall implement and conduct a risk assessment of potential hazards for the health and safety of the personnel on site, measures to control such risks (including suitable safety and working regulations for the work on site, emergency and evacuation procedures, and effective medical aid systems and resources), and potentially necessary corrective measures. Prior to their performance of any activity on site, Customer shall provide Guascor Energy's and its sub-suppliers' personnel with the required safety and working regulations and related trainings. If Guascor Energy provides Customer with a safety and health document for the site, the Customer shall comply with the regulations contained therein, including provided updates.

The Customer is responsible for ensuring that the site, including the ambient air and all parts of the plant Guascor Energy's employees or subcontractors may encounter, are free of asbestos. The ambient air shall be deemed free of asbestos if the airborne asbestos fiber concentration does not exceed 1,000 fibers/m³ measured with SEM or 10,000 fibers/m³ measured with PCM. Upon request by Guascor Energy, the Customer shall certify these conditions by a licensed and independent institute. Guascor Energy shall be entitled to perform corresponding measurements.

In case aforementioned parts or ambient air is not free of asbestos or as long as the permanent absence of asbestos is not ensured, Guascor Energy may, without limiting its other rights and remedies, suspend any work in affected areas and reject any delivery of asbestos-containing parts to its factory or workshop until it is certified by a licensed and independent institute that the site and the parts are free of asbestos. The costs of such certification and/or other expenses related to on site asbestos shall be borne by the Customer. Guascor Energy may nevertheless agree to perform certain limited scope of work under defined protection measures to the extent determined by Guascor Energy. Guascor Energy shall be entitled to compensation for any additional cost incurred and to a reasonable extension of time for the provision of the Works.

All local transportation provided or arranged by the Customer shall be booked with companies which are certified in terms of quality and safety. Local cars used for crew transportation shall be safe, in a good state of maintenance, equipped with safety belts, headrests, airbags, and where required, 4-wheel drive. The drivers shall be experienced and have good company records. When required by the country, special guidance, protection, special or spare tires and safety measures shall be arranged by the Customer.

Basic Customer HS Risk work location requirements are: fenced-in work area; controlled entrance; first-aid staff and equipment; plant gas and fire alarm system; site emergency plan; full time HS Risk coordinator; sanitary provisions and canteen facilities; good house-keeping and waste control; permit-to-work system and regular site inspections; personal protection equipment; hoisting, fire-fighting, electrical and hydraulic equipment; to be yearly inspected and in good working order

- 7.7 For any portion of the Works performed by Guascor Energy and/or its subcontractors on a time basis, the Customer shall confirm with Guascor Energy on a weekly basis the hours worked by Guascor Energy's and/or its subcontractors' personnel.

8. Changes to the Works, Variations

- 8.1 Either party may at any time request in writing changes, modifications or additions to the scope of the Works (hereinafter referred to as "**Variation**"). Upon receipt of a Variation request, Guascor Energy shall provide the Customer with a written quotation for the requested Variation, specifying the effects of the requested Variation on the Contract, including any necessary adjustment of the Contract Price, time schedules and agreed dates, scope of the Works and any other affected provisions of the Contract.

If the Customer wishes to proceed with a requested Variation on the basis of Guascor Energy's quotation, the Customer shall notify Guascor Energy thereof in writing within 14 days of receipt of the quotation. Guascor Energy is not obliged to give effect to the Variation until it has been agreed in writing by the parties.

- 8.2 If applicable laws, rules and regulations, engineering standards and codes of practice, and decisions or guidance issued by courts or public authorities are amended or added to after the date of Contract signature, Guascor Energy shall be entitled to an adjustment of the Contract, including inter alia an adjustment of the Contract Price to reflect any additional costs to be incurred by Guascor Energy, the time schedules and scope of Works, as necessary in order to compensate for any adverse effects or additional requirements deriving from such changes.

Guascor Energy shall comply only with those engineering standards and codes as listed in the technical specifications at the date of the Contract. In the event that, at any time, mandatory local codes or standards in the country where the project is located stipulate more stringent or onerous requirements with regard to the Works, the Customer is obliged to inform Guascor Energy accordingly and the Customer shall (i) request a quotation from Guascor Energy specifying the effect of those more stringent requirements on the total Contract Price, on the agreed dates for delivery of the Works, the payment and any other provision under the Contract, and (ii) shall enter into a Variation in accordance with this Clause 8 based on such quotation.

- 8.3 Without prejudice to the parties' right to request Variations, Guascor Energy may at any time make changes to the Works without the Customer's prior approval, provided such changes by Guascor Energy do not adversely affect the agreed operability, functionality or technical characteristics of the Works. Guascor Energy shall not be entitled to any additional payment, extension of time, or other adjustment of the Contract in respect of such changes.

9. Acceptance

- 9.1 If the Works are subject to acceptance, the Customer shall accept the Works upon their completion including successful performance of acceptance tests if such tests have been agreed on. In case of partial delivery, the Customer shall accept functional parts of the Works separately upon their completion.
- 9.2 If Guascor Energy notifies the Customer that the Works or a part of the Works are ready for acceptance, the Customer shall declare the acceptance of the Works or relevant part in writing within two weeks of the notified date. Upon expiry of the two-week period the Works or relevant part of the Works shall be deemed accepted, unless the Customer has stated and substantiated in writing legitimate grounds on which it refuses acceptance. The acceptance shall be effective as of the date of Guascor Energy's notification.
- 9.3 In any case, the Works or parts of the Works shall be deemed accepted as soon as they are put into commercial operation or if the acceptance tests have not been carried out within 1 week after their scheduled dates due to reasons not attributable to Guascor Energy.

- 9.4 The Customer shall be entitled to refuse acceptance only in case of Defects (as defined in Clause 10.1 below) in the Works which significantly affect the use of the Works. Those items shall be listed in the acceptance record and shall be remedied by Guascor Energy within a reasonable period of time or as agreed between the parties.
- 9.5 In the event performance tests, functional tests, and/or trial runs are to be carried out by Guascor Energy after the Works have been accepted pursuant to the previous paragraphs, acceptance shall not be affected by any failure to pass said tests.
- 9.6 All costs and expenses of the Customer and any third parties (other than those of Guascor Energy's own personnel or its contractors) incurred in connection with inspections, tests, approvals, acceptance procedures etc. shall be borne by the Customer.

10. Defects Liability

- 10.1 In this Contract, and subject to Clause 10.2, a defect shall mean any non-conformity of the Works with the express terms of this Contract resulting from circumstances existing in the Works at the time of the transfer of risk to the Customer ("**Defects**").
- 10.2 The following shall not be Defects:
- a) normal wear and tear, non-conformity resulting from excessive strain,
 - b) non-conformity resulting from faulty or negligent handling; non-compliance with instructions or recommendations in operation or maintenance manuals and other documents;
 - c) installation, erection, modification, commissioning, or pre-commissioning, in each case not carried out by Guascor Energy,
 - d) non-reproducible software errors,
 - e) defects which do not significantly impair the use of the respective Works.
- 10.3 The Customer shall notify Guascor Energy in writing of any Defects without undue delay.
- 10.4 Upon such written notification, Guascor Energy shall, at its option, remedy a Defect by repair, replacement, or re-performance. Guascor Energy shall be given a reasonable period of time and opportunity to remedy the Defect. For this purpose, the Customer shall grant Guascor Energy working access to the non-conforming Works, shall undertake any necessary dis-assembly and re-assembly, and shall provide access to operation and maintenance data, all at no charge to Guascor Energy. Upon Guascor Energy's request, the Customer shall ensure that title to the replaced defective parts shall transfer to Guascor Energy.

The Customer shall be responsible for the customs clearance in the country where the Works are delivered and for the further transport from the places of delivery for all equipment necessary to remedy the Defect.

Insofar as a part has to be merely delivered, the Customer shall immediately inspect that part and shall notify Guascor Energy in writing of any Defects without undue delay. Customer's claims for defects shall be excluded for any apparent defects, if the Customer has failed to do so.

- 10.5 Unless otherwise agreed, the defects liability period for any part of the Works is 12 months. It starts at the date of transfer of risk.

For replaced or repaired parts of the Works, the defects liability period is 6 months from the date of replacement or repair, if the original defects liability period for the Works expires earlier. In any event, the defects liability period shall end no later than 24 months from the beginning of the original defects liability period.

Guascor Energy is not liable for any Defects unless notified in writing by the Customer to Guascor Energy before the end of the defects liability period.

- 10.6 Guascor Energy does not represent, warrant or guarantee that the Works will be secure from Cyberthreats or that they do not contain any Vulnerability." Vulnerability" shall mean any weakness in the Works that could be exploited to permit unauthorized access, use or modification to the Works or computing environment. If software is defective, Guascor Energy shall only be obliged to provide the Customer with an updated version of the software in which the Defect has been remedied when such updated version is reasonably available from Guascor Energy or, if Guascor Energy is only licensee, from Guascor Energy's licensor. If the software has been modified or individually developed by Guascor Energy, Guascor Energy shall in addition provide the Customer with a workaround or other interim corrective solution until the provision of an updated version of the software, if such workaround or interim solution is feasible at reasonable expense and if otherwise the Customer's business operations would be substantially impeded.
- 10.7 If Guascor Energy carries out remedial work and it is ultimately not established that there was a Defect, the Customer shall pay Guascor Energy for such remedial work including error diagnosis.
- 10.8 Any other liability of Guascor Energy and any claims, rights and remedies of the Customer in case of defects of the Works shall be excluded except as expressly stipulated in this Clause 10 and – provided Guascor Energy failed at least three times in remedying the Defect – in Clause 16.2 b). All warranties, representations, conditions, and all other terms of any kind whatsoever implied by statute or common law are, to the fullest extent permitted by applicable law, excluded from this Contract.
- 11. Intellectual Property Rights**
- 11.1 If a third party asserts legitimate claims against the Customer that the Works infringe an IPR owned by such third party, then subject to the following provisions of this Clause 11, Guascor Energy shall, at its option and expense, either:
- a) obtain a right to use the relevant IPR in connection with the Works; or
 - b) modify the Works so as not to infringe the relevant IPR; or
 - c) replace the infringing part of the Works.
- If, in the opinion of Guascor Energy, none of the foregoing is reasonably possible, Guascor Energy may take back the relevant part of the Works and reimburse the price for such part.
- 11.2 Guascor Energy's obligations in Clause 11.1 are subject to the following conditions:
- a) the Customer has immediately notified Guascor Energy in writing of the third party's claim and furnished Guascor Energy with a copy of each communication, notice or other action relating to the alleged infringement;
 - b) the Customer does not acknowledge an infringement and provides Guascor Energy with the authority, information and assistance reasonably required by Guascor Energy to defend or settle such claim; and
 - c) Guascor Energy is given sole control of the defence (including the right to select counsel), and the sole right to settle such claim.
- If the Customer ceases to use the Works or any relevant portion thereof, it shall notify the third party in writing that this cessation of use is not an admission of IPR infringement.
- 11.3 Any claims of the Customer shall be excluded if the Customer (including its agents, employees or contractors) is responsible for the IPR infringement. The Customer shall be deemed responsible for the claimed IPR infringement if, without limitation, it was caused by (i) specific demands of the Customer, (ii) use of the Works for a purpose or in a manner not foreseeable by Guascor Energy, (iii) a modification of the Works by the Customer, or (iv) use of the Works in connection with other equipment.
- 11.4 This Clause 11 sets forth Guascor Energy's entire liability for infringement of third party IPRs. Any other claims, rights, and remedies of the Customer shall be excluded.

12. Liability

Unless explicitly stipulated in this Contract, this Clause 12 shall exclusively govern the liability of Guascor Energy for damages, costs and expenditures, regardless of the legal theory upon which it is based, including, but not limited to liability in Contract, in tort (including negligence), misrepresentation, indemnity, under warranty or otherwise.

- 12.1 Guascor Energy shall be liable for bodily injuries and for intentional acts or omissions pursuant to the applicable law.
- 12.2 Guascor Energy shall in no event be liable, whether pursuant to any indemnity or in contract, tort (including negligence and statutory duty) or otherwise for loss of profit or revenue, loss of production, interruption of operations or loss of use, cost of capital, loss of interest, loss of information and/or data, for claims arising from Customer's contracts with third parties, loss of hydrocarbons, loss of power, cost of purchased or replacement power, or for any indirect or consequential damage.
- 12.3 Guascor Energy's total liability, whether pursuant to any indemnity or in contract, tort (including negligence and breach of statutory duty) or otherwise arising by reason of or in connection with the Contract shall not exceed for loss of or damage to Customer's property the lesser of (i) the Contract Price, and (ii) € 250,000 per event with an aggregate limit of 2 events per calendar year. For the avoidance of doubt, the same shall apply to damage or loss caused to the Works by Defects or remedial work carried out by Guascor Energy after delivery to or acceptance of the Works by Customer, as the case may be.

For any type of loss or damage, Guascor Energy's total aggregate liability arising out of or in connection with this Contract shall not exceed the Contract price or the amount of € 1,000,000, whichever is lower.
- 12.4 Any limitations of liability set forth in this Contract shall also apply for the benefit of Guascor Energy's Affiliates, subcontractors, employees, agents or any other person acting for Guascor Energy.
- 12.5 The limitations of liability set forth in this Clause 12 or in any other Clause of the Contract shall not apply in the case of mandatory liability.
- 12.6 If the Customer is not or shall not be the sole end user and ultimate owner of the Works or is procuring them for the benefit of any kind of joint venture, the Customer shall include a clause in its contracts with the end user, ultimate owner or joint venture participants so that Guascor Energy is given the benefit of the indemnities, exclusions and limitations of liability in the Contract by all such users, owners or participants (as if the user, owner or participant were the Customer) and shall indemnify Guascor Energy against claims by them to the extent that Guascor Energy would not be liable therefor to the Customer under the Contract if the claim had been made by the Customer.
- 12.7 Any and all liability of Guascor Energy under this Contract shall cease with the expiry of the defects liability period of the Works.
- 12.8 Any rights and remedies of the Customer against Guascor Energy that are not expressly stipulated in the Contract shall be excluded.
- 12.9 The Customer shall secure that at its own cost a Construction/Erection All Risks ("CEAR") insurance is effected and maintained for the whole scope of site works, starting with the beginning of any site works until the beginning of commercial operation, under which Guascor Energy, all of its affiliated companies as well as its subcontractors involved in the scope under the contract shall be named as additional insured parties including a waiver of subrogation. This CEAR insurance shall be extended to provide an extended maintenance cover during Guascor Energy's defects liability period after beginning of commercial operation. This cover shall be in accordance with good international industrial standards applied for projects of comparable size, with not broader exclusions and restraints as are typically required by the international insurance market for this type of policies, and the policy shall contain all typical extension (e.g. LEG 2/96) as are commonly provided under such type of policies. The Customer shall send a copy of this CEAR insurance to Guascor Energy within 90 days before start of any site activities.
- 12.10 The Customer hereby holds Guascor Energy harmless and indemnifies Guascor Energy from all claims for pollution and environmental impairment caused by the Work whether based on any claim of negligence on the part of Guascor Energy, or any other cause whatsoever.

12.11 Notwithstanding any other provision of this Contract, the liability arising out of or resulting from a Nuclear Incident shall be exclusively governed by the following provisions of this Clause and the principles of the international conventions (the Vienna Convention on Civil Liability for Nuclear Damage adopted on 21 May 1963 or the Convention on Third Party Liability in the Field of Nuclear Energy of 29th of July 1960, as amended by the Additional Protocol of 28th of January 1964 and by the Protocol of 16th of November 1982). "**Nuclear Incident**" means any occurrence or series of occurrences having the same origin which causes bodily injury or death or loss or damage to property, loss of use of property, loss or damage to environment or any financial losses not related to above losses or damage arising out of or resulting from the radioactive, toxic, explosive, or other hazardous properties of source, special nuclear, or by-product material.

The Customer shall waive any claim and right of recourse and will furnish written evidence that insurers of the Customer waive all rights of recourse and shall indemnify and hold harmless Guascor Energy (and all companies in the Guascor Energy's group of companies, and their employees, officers, agents, suppliers, sub-contractors, licensors and their respective employees) from and against all claims, damages, losses and expenses (including legal fees and expenses and costs for restoration of environment) in respect of bodily injury, sickness, disease or death or property damage, environmental damage, or financial damage not related to above losses or damage including but not limited to loss, loss of use, or damage, whether on-site (including all nuclear electric generating units at the site) or off-site arising out of or resulting from a Nuclear Incident.

The Customer shall maintain or cause the plant owner and/or operator to maintain in force nuclear liability and nuclear property damage insurance, satisfactory to Guascor Energy. Such insurance shall either name Guascor Energy as an additional named insured or provide that Guascor Energy shall be protected as its interests may appear.

Under no circumstances shall the Customer deem or represent Guascor Energy as being the operator of a nuclear power plant for any purpose. Further, the Customer shall, or shall cause plant owner and/or operator to take such steps as are necessary to assure that plant owner and/or operator, as appropriate, is designated by the appropriate governmental authorities of the country for which the Works is (ultimately) destined as the operator of the nuclear power plant.

The Customer shall, without cost to Guascor Energy, perform any required decontamination, disposal and health physics to the extent necessary for Guascor Energy to perform its contractual obligations. This includes decontamination of any Guascor Energy's equipment or tools used in the performance thereof. Guascor Energy shall in no event be obliged to perform such decontamination, disposal or health physics and the schedule shall be amended to take into account any delays caused by such measures.

The protection afforded to Guascor Energy by the provisions of this Clause shall be in effect until the nuclear power plant is permanently decommissioned. This Clause may be enforced by Guascor Energy's employees, officers, agents, suppliers, subcontractors, licensors and their respective employees.

12.12 To the extent the Works include supervision, Guascor Energy is only obliged to provide correct and clear instructions and shall not be liable for the consequences of any non-compliance with those instructions.

13. Assignment and Sub-contracting

13.1 The Customer may not assign this Contract or any part thereof without Guascor Energy's prior written approval.

13.2 Guascor Energy may transfer, assign, or novate the Contract or any part of it to an affiliated company ("**Affiliate**"), being Guascor Energy itself and any corporation, company, branch or other legal entity that is affiliated to Guascor Energy.

13.3 Guascor Energy shall further be entitled to assign the whole Contract or a part of it to any third party, in the event of a sale or other transfer of the business or a part of the business of Guascor Energy to a third party.

13.4 Guascor Energy may sub-contract parts (but not all) of the Works.

14. Confidentiality, Data Protection

- 14.1 The parties shall use any documents, know-how, data or other information provided by the other party ("**Information**") exclusively for the purpose of this Contract and keep the same confidential subject to the following. The parties may disclose Information to employees of the receiving party and to third parties who reasonably need to know such Information for the purpose of the Contract provided such employees and third parties are bound by equivalent confidentiality obligations. The party disclosing Information shall be held liable for a breach of such obligations by its employees or a third party.
- 14.2 This confidentiality obligation shall not apply to Information which
- is or becomes part of the public domain other than by fault of the receiving party;
 - is disclosed to the receiving party in good faith by a third party who is entitled to make such disclosure;
 - is developed independently by the receiving party without reliance on Information;
 - was known to the receiving party prior to its disclosure by the other party; or
 - is required to be disclosed by law (subject to the receiving party's obligation to notify the disclosing party in a timely manner of such requirement).
- 14.3 The Customer shall only be entitled to take photographs or videos or to otherwise record the performance of the Works with Guascor Energy's prior consent. In addition, only personnel of the Customer who operate the plant shall be entitled to be present during the performance of the Works by Guascor Energy.
- 14.4 This confidentiality obligation shall survive the expiration or termination of this Contract for 5 years.
- 14.5 Guascor Energy and the Customer shall comply with the statutory provisions relating to protection of personal data. The Customer is obliged to create the prerequisites required by law (e.g. to obtain declaration of consents) to enable Guascor Energy to perform the Works without any breach of law. The Customer is advised to take appropriate measures – as far as possible – to prevent access of Guascor Energy to personal data or trade secrets of the Customer while providing the Works. In the event that it cannot be prevented that Guascor Energy is granted access to personal data of the Customer, the Customer is obliged to inform Guascor Energy in due time before the Works are performed. The Customer and Guascor Energy shall then agree on the actions to be taken.
- #### 15. Suspension
- 15.1 Guascor Energy may suspend performance of its obligations under the Contract if (i) the Customer is in delay with any payment or in providing any payment security required under this Contract for more than 30 days, (ii) the Customer fails to perform those of its obligations necessary for Guascor Energy to provide the Works, or (iii) the Customer otherwise materially breaches the Contract.
- 15.2 If Guascor Energy suspends the Contract in accordance with Clause 15.1 or in the event the Customer suspends the Contract without the express written agreement with Guascor Energy, the Customer shall become immediately liable to pay Guascor Energy for all parts of the Works already provided. The Customer shall further reimburse Guascor Energy all reasonable additional costs and expenses incurred as a result of such suspension (e.g. payments to subcontractors, cost of waiting time, demobilization and remobilization, etc.). Any contractual dates shall be extended for a reasonable period to overcome the effects of the suspension.
- #### 16. Termination
- 16.1 Either party may terminate this Contract with immediate effect by written notice, if the other party becomes bankrupt or insolvent, has a receiving order made against it or compounds with its creditors, or carries on business under a receiver, trustee or manager for the benefit of its creditors or goes into liquidation.
- 16.2 Save as provided under Clause 6.4 and Clause 16.1, the Customer may terminate the Contract only in the circumstances set out below and in each case upon 14 days written notice to Guascor Energy:

- a) in the event of delay, if the maximum liquidated damages under Clause 4.3 are payable, a reasonable additional period of time for provision of the Works has been granted to Guascor Energy and has expired, and within that time Guascor Energy has not provided a commitment to pay further liquidated damages exceeding the before-mentioned maximum liquidated damages in respect of the continuing period of delay; or
 - b) in the event Guascor Energy has materially breached the Contract and has not remedied the breach within a reasonable period after receiving written notification of the breach from the Customer.
- 16.3 Any termination by the Customer shall not affect those parts of the Works already delivered or performed in accordance with the Contract prior to termination. In the event of termination of the Contract in accordance with Clause 16.2, the Customer shall remain liable to pay Guascor Energy for all parts of the Works already provided prior to termination. The Customer shall be entitled to compensation for the reasonable costs incurred in excess of the Contract Price if it has had the Works completed by a third party. For the avoidance of doubt, Clause 12 shall apply in case of termination. The right to rescind the Contract is excluded.
- 16.4 Notwithstanding any other rights it may have under this Contract, Guascor Energy may terminate the Contract
- a) if the Customer comes under the direct or indirect control of any competitor of Guascor Energy; or
 - b) if the Customer materially breached the Contract and has not remedied the breach within a reasonable period after a notification by Guascor Energy or is in delay in making any payment for more than 60 days or in providing any payment security required under this Contract for more than 60 days; or
 - c) if the Contract has been suspended for more than 60 days.
- 16.5 In the event of termination by Guascor Energy, Guascor Energy shall be entitled to recover from the Customer (i) the Contract Price less any saved or avoided expenditure and (ii) any additional cost and expenses incurred by Guascor Energy due to such termination.
- 17. Dispute Resolution, Applicable Law**
- 17.1 The Contract and any dispute or claim arising out of, or in connection with, it or its subject matter or formation (including non-contractual disputes or claims) shall be governed by and construed in accordance with the substantive laws of Spain excluding the choice of law rules. The UN Convention on Contracts for the International Sale of Goods shall not apply.
- 17.2 If a dispute arises out of or in connection with this Contract, the responsible representatives of the parties shall attempt, in fair dealing and good faith, to settle such dispute. Upon request of a party, a senior management representative of each party shall participate in the negotiations. Each party shall be entitled to terminate these attempts by written notification to the other party(-ies) at any time.
- Nothing in this Clause shall limit the right of the parties to seek relief intended to preserve the status quo or interim measures in any court of competent jurisdiction, or from an emergency arbitrator or arbitral tribunal.
- 17.3 The parties shall attempt to agree on a procedure for alternative dispute resolution (“ADR”) and the applicable procedural rules (including time limits) within 14 calendar days after a termination notice under Clause 17.2 has been received by the other side. If the parties fail to agree on such procedure each party shall be entitled to refer the dispute to arbitration pursuant to Clause 17.4.

- 17.4 All disputes arising out of or in connection with the Contract which are not resolved pursuant to Clause 17.2 and 17.3 including any question regarding the termination or any subsequent amendment of the Contract shall be submitted to the International Court of Arbitration of the International Chamber of Commerce and shall be finally settled in accordance with the Rules of Arbitration of the International Chamber of Commerce (“ICC”). If the value of the total matter in dispute, including the value of any counterclaims, is € 1 million or above, the expedited procedure provisions of the Rules shall not apply and the arbitral tribunal shall consist of three arbitrators. If the tribunal consists of three arbitrators, each party shall nominate one arbitrator for confirmation by the ICC. Both arbitrators shall agree on the third arbitrator, within 30 days after their appointment. Should the two arbitrators fail to reach agreement on the third arbitrator within the thirty-day period, the ICC shall select and appoint the third arbitrator.
- 17.5 The seat of arbitration shall be Madrid, Spain. The language to be used in the ADR procedure and the arbitration proceeding shall be English or Spanish. Any order for the production or disclosure of documents shall be limited to the documents on which each party specifically relies in its submission(s).
- 17.6 Consolidation of arbitrations pending under the Rules of Arbitration of the ICC into a single arbitration shall only be possible if all parties have agreed to consolidation.
- 17.7 Upon request of a party, the arbitral tribunal shall order any claiming or counterclaiming party to provide security for the legal and other costs of any other party related to that claim or counterclaim, by way of bank guarantee or in any other manner and upon such terms as the arbitral tribunal considers appropriate.
- 18. Export Regulations**
- 18.1 If the Customer transfers the Works (hardware and/ or software and/ or technology as well as corresponding documentation, regardless of the mode of provision) delivered by Guascor Energy or works and services, regardless of the mode of provision, and/ or including all kinds of technical support) provided by Guascor Energy (including all kinds of technical support) performed by Guascor Energy to a third party, the Customer shall comply with all applicable national and international (re-) export control regulations. In any event of such transfer of goods, Works and services, the Customer shall comply with the (re-) export control regulations of the European Union and of the United States of America.
- 18.2 Prior to any transfer of goods, Works, and services provided by Guascor Energy to a third party, the Customer shall in particular check and guarantee by appropriate measures that:
- (i) there will be no infringement of an embargo imposed by the European Union, by the United States of America and/or by the United Nations by such transfer, by brokering of contracts concerning those goods, Works and services or by provision of other economic resources in connection with those goods, Works and services, also considering the limitations of domestic business and prohibitions of by-passing those embargos; and
- (ii) such goods, Works and services are not intended for use in connection with armaments, nuclear technology or weapons, if and to the extent such use is subject to prohibition or authorization, unless required authorization is provided.
- The regulation of all applicable Sanctioned Party List of the European Union and the United States of America concerning the trading with entities, persons and organizations listed therein are considered.
- 18.3 If required to enable authorities or Guascor Energy to conduct export control checks, the Customer, upon request by Guascor Energy, shall promptly provide Guascor Energy with all information pertaining to the particular end customer, the particular destination and the particular intended use of goods, Works and services provided by Guascor Energy, as well as any export control restrictions existing.
- 18.4 The Customer shall indemnify and hold harmless Guascor Energy from and against any claim, proceeding, action, fine, loss, cost and damages arising out of or relating to any non-compliance with export control regulations by the Customer, and the Customer shall compensate Guascor Energy for all losses and expenses resulting thereof.

19. Miscellaneous

- 19.1 Guascor Energy shall not be obliged to fulfill this Contract if such fulfillment is prevented by any impediments arising out of national or international foreign trade or customs requirements or any embargoes or other sanctions. Guascor Energy shall further not be obliged to fulfill this Contract if Guascor Energy or any of its Affiliates would be exposed to, or adversely affected by, detrimental measures, penalties, loss of privileges or any other acts or omissions of government, governmental or other public authorities including any entities acting on their behalf (or threats thereof), or any subcontractor or sub-supplier rejects delivery due to the same reasons.
- 19.2 If any provision of this Contract is prohibited or declared invalid or unenforceable by any court or tribunal of competent jurisdiction, this shall not affect the validity or enforceability of any other provision. The parties shall use their reasonable efforts to substitute such provision by a legal, valid or enforceable one with the same or a similar result.
- 19.3 Any amendments, changes or additions to this Contract must be made in writing in the form of a written agreement signed by authorised representatives of both parties.
- 19.4 No delay or omission by either party in exercising any right, power or remedy provided by law or under this Contract shall affect, impair or operate as a waiver of such right, power or remedy.
- 19.5 This Contract constitutes the entire agreement between the parties and supersedes and extinguishes all previous agreements, promises, assurances, warranties, representations and understandings between them, whether written or oral, relating to its subject matter. Each party acknowledges that in entering into this Contract it does not rely on, and shall have no remedies in respect of, any statement, representation, assurance or warranty (whether made innocently or negligently) that is not set out in this Contract. Each party agrees that it shall have no claim for innocent or negligent misrepresentation based on any statement in this Contract.
- 19.6 This Contract is drawn up in the English language. If this Contract is translated into another language, the English language text shall in any event prevail.
- 19.7 Nothing in this Contract shall be deemed to create an employment relationship between Guascor Energy and the Customer or any of their personnel or subcontractors.
- 19.8 The Customer is not entitled to issue instructions to Guascor Energy's employees. Guascor Energy is free to select and allocate the personnel deployed for the performance of the Works. Guascor Energy alone shall pay for all compensation and social benefits of its employees.

Algunos contactos que recibieron este mensaje no suelen recibir correos electrónicos de tania.velasco@guascor-energy.com. Por qué es esto importante

Dear Sir or Madam,

I am writing on behalf of the Spanish company "**Guascor Energy, S.A.U.**", which is a creditor of company:

"**P.B.S d.o.o**"

HR56701335999

Spinciceva 2, 5100 Rijeka

We have been informed that this company is in a pre-insolvency situation, and we would like to ensure that we are recognized as creditor of said company and to claim payment of our credit right and that such right be recognized.

For this reason, we have completed and attached the form that we believe is the one to be used in these cases, attaching the following documentation support:

- **Creditor's claim application form**
- **Unpaid Invoices**
- **Oder Acknowledgement (OAs) (Official Acts / Procedural Documents)**
- **Terms and Conditions of Sale**

Could you please confirm whether company "P.B.S d.o.o" is indeed in an insolvency or pre-insolvency situation, and whether this is the correct way to file our credit claim?

Thank you in advance for your cooperation.

Saludos/ With best regards,

Tania Velasco Martínez
