MATERIAL DELIVERY PROTOCOL

for

NB491 - TANKER FOR CHEMICAL AND OIL PRODUCTS 45,000 DWT

„Onega Gulf“

(Ex – Hrvatska Brodogradnja Trogir Hull No. 339)

The undersigned, Viterlef Management Ltd (the **“Owner”**) hereby delivers, and BRODOSPLIT JSC (the **“Contractor”**) hereby accepts partial material for unfinished Tanker for Chemical and Oil Products ex Sevmarsh Hull No. 98088, IMO 937373, the MT Onega Gulf, owned by the Owner (the **“Material”**). The subject **Material** was previously stored in HBT d.o.o. warehouse.

The **Material** transfer for NB491 started 27th May 2021 and completely finished 10th November 2021.

The **Material** transfer was scheduled and organized under the full responsibility of the vessel **Owner**, with support and assistance of the **Contractor**.

The list of transferred material is attached to this **Protocol**:

(NB491 – LIST OF TRANSFERRED MATERIAL- REPORT.xlsx)

The subject list is mostly on Croatian language, because the source for this document was done by HBT d.o.o. (**Inventory report**). The document is partially translated (the first column only) for better understanding, but without intention to become the document with officially named material.

IN WITNESS WHEREOF, the **Owner** and the **Contractor** have executed this **Material Delivery Protocol** as of the date and time indicated above.

For and on behalf of the **Owner**

Signed with remarks:

Mikhail Kuznetsov

For and on behalf of the **Contractor**

Dalibor Vukičević

The Owner's remarks:

The **Material** transfer for NB491 started 27th May 2021 and mostly finished in August 2021 in accordance to the actual execution of the transfer plan and completely finished on the 10th November 2021.

Actual work schedule execution by the trucks:

- from 27th of May till the 30th of June 2021 – 85 trucks;
- in July 2021- 29 trucks;
- in August 2021 - 14 trucks;
- in September 2021 – 2 trucks;
- in October 2021 – 2 trucks;
- in November 2021- 1 truck.

VITERLEF REMARKS

22.02.22.

The **Material** transfer was scheduled and organized under the full responsibility of the vessel **Owner**, with support and assistance of the **Contractor**. The priority for the transfer of materials and equipment was regulated and agreed by the **Contractor** for the purposes of early and effective planning of work and activities on the vessel.

Contractor observations on Owner's remarks:

NB 419 – Vessel towing report (process total value: 101.448,89 €)

This report is based on approved document (see enclosure):

NB491 Brodosplit assistance - Coast calculation 31_07_2021 rev3 ZS

The towing process was performed at 09 June, 2021 on the route: HBT (Trogir) – Brodosplit, Split.
The process started at 08:00 o'clock and finished at 14:00 o'clock.

Content:

- A1 Vessel towing operation - BRODOSPAS
- A2 Towing approval by Class - CRS (Croatian register of Shipping)
- A3 Agent assistance - Bandic Maritime
- A4 Towing insurance - Euroherc, Adriatic, Triglav, Malakut
- A7 Towing plan – calculation - BIS – Design

(All other Items from document ***NB491 Brodosplit assistance - Coast calculation 31_07_2021 rev3 ZS*** are agreed and approved by Viterlef team according to internal Brodosplit documentation,

A1 Vessel towing operation - BRODOSPAS (41.500,00 €)

The subject operation was performed by BRODOSPAS Company, specialized for towing assistance for worldwide operation, with tugboats fleet situated in Adriatic region. The final offer for vessel towing was based on 50 T bollard pull, according to CRS calculation and request.

The operation was performed by 3 tugs (in HBT harbor) and 4 tugs (Brodosplit harbor). The main tug was M/V „JAKI“ (50 T), supported by M/V ARGUS, M/V KASTOR, and M/V RIGEL.

A2 Towing approval by Class - CRS Croatian register of Shipping (1.880,00 €)

Towing approval was issued after several revisions, based on Brodosplit stability calculation (three revisions). The reason for several revisions was in vessel towing preparation and requirements changed during ballasting. The vessel position of the vessel in HBT did not allow full ballasting because of shallow water in outfitting area.

The variation of ballast water center of gravity issued calculation revisions by CRS.

A3 Agent assistance - Bandic Maritime (6.420,00 €)

The Agent was engaged for entire process of: vessel inspection on site, pilot in HBT, costal pilot, pilot in Brodosplit, and towing documentation issuing and approval (BIMCO, CIMIS).

A4 Towing insurance - Euroherc (15%), Adriatic (15%), Triglav (20%), Malakut (50%) (18.888,60 €)

According to very specific insurance EU requirements, we have 4 (four) companies engaged. The subject insurance is part of total insurance Contract (vessel towing and vessel outfitting).

A7 Towing plan – calculation - BIS – Design (14.500,00 €)

As we already mentioned, the several Towing plan revisions issued. This was caused by vessel preparation process changes. The first revision was based on Brodosplit calculation for 20 T bollard pull. The 20 T bollard pull was result of Brodosplit stability calculation, but rejected by CRS. CRS as authority society insisted on final 50 T bollard pull. The organization of vessel towing inspection and approval has inspection on site, a day before towing. Day before towing, inspector on site requested some additional calculations and sketches, even towing plan was approved. Our team worked over night to issue a requested documents and that is the reason that our first cost evaluation was lower than final price for entire process.

All other costs for towing process are calculated according to Enclosure 6 to the Contract NB 491.
