### Inspection, deficiencies and damages

- a) The plate with HULL number is missing
- b) Two AC, with 16000 BTU, ERGON.
- c) Engine should be checked, looks like the turbin was overheated.
- d) Small interior damages

### REMARKS

The boat looks very good, small damages normal for the boat in charter. The boat has an additional generator, strong AC with 16.000btu. Normal spring maintenance (antifouling, polishing, generator, and AC service) is required. The engine should be checked, looks like the turbine is over heated.
