1. The lift shaft must be constructed to accommodate the loadings indicated on our drawings and with a minimum 7KN high density block.
2. The lift shaft must be plumb-0mm, +5mm over the full length, sizes must comply with our drawing. The lift finished floor level datum must be marked at each entrance.
3. The shaft must comply with the fire and building regulations.
4. The well shall be suitably ventilated. In the absence of relevant regulations or standards, it is recommended that ventilation openings at the top of the well, with a minimum area of 1 % of the horizontal section of the well, are provided. The lift shaft temperature must be maintained between 15C - 35C.
5. The shaft must be accessible into building and lift shafts suitable for a component length of 5.0M.
6. The pit must be permanently watertight and the surface must be smooth, level and painted. The concrete base should be designed to take the loads stated on the drawing. The pit depth must be accurate to +/-20mm.
7. Provide pad stones or steel supports where necessary.
8. Provide and fix temporary guards around the lift entrances to comply with health and safety at work act requirements.
9. The front return walls shall be built as shown and finished following the final fixing and positioning of our entrance frames. All recesses shall be completely filled in accordance with our drawing.
10. Clear away all builder work debris before, during and after the erection of the lift.
11. A weatherproof area will be provided on site for the storage of lift materials.

Hi,

They also can make 1050 fire-rated 2 panel doors

On Mon, Jul 8, 2024 at 9:31 AM <[orestis.ierodiakonou@wyltor.com](mailto:orestis.ierodiakonou@wyltor.com)> wrote:

Hello dear Dejan,

The doors cannot be fitted inside the shaft according to our can and car frame specifications. Please check the attached plan view, where the 1050mm doors marginally fit.

You will need to break the concrete wall along the entire height to place a door with width of 1100mm.

Looking forward for your reply.

Hello dear Dejan,

Attached you will find two offers **TQ32843** and a **plan view** of ours regarding the **SB Helipad**. One offer with our doors and one without doors.

I wanted to let you know that I decreased the internal height of the cabin and of the doors in order to avoid the low headroom protection system. Also, I included 2PT doors with width 1050mm and E120 fire-rating resistance. The two panel doors with width 1100mm does not fit.

For any further information, correction or assistance we are at your disposal.

**Subject:** SB Helipad

Hi Orestis,

While I wait for payment for my first order I need to check one possibility with you.

I should have started an order with doppler but the investor finally accepted my comments about door width and cabin depth that in this case it cannot accept any patient in the ambulance stretcher.

Since the elevator is exiting on top stop to a helipad acces they decided to change the elevator configuration but the shaft is already made.

Drawings are attached. the changes are:

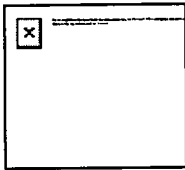

We need to go as wide and deep as possible with cabin size and the landing doors will be installed on top of floors (so don't count them inside the shaft).

Shaft is : 1870 mm x 2730 mm

Landing doors need to be 1100 mm opening, automatic

Elevator should have a bigger cabin but a plate with 1000 kg weight but the calculations can be made for a bigger elevator if it should be based on the cabin size if you understand it.

Best regards

Hi,

Looking from the elevator entrance in the top floor the counterweight is on the right.

Voice announcer should be in Croatian and I am sure MLC has it :)

P.S. What is the estimated delivery time?

Best regards

On Fri, Jul 12, 2024 at 1:46 PM <orestis.ierodiakonou@wyltor.com> wrote:

Hello Dejan,

I checked everything in order to forward your order TQ32843 into production and I need few clarifications in order to not make any mistake.

First of all, I corrected the offer that I have sent you. I added the LOP's which for some reason was excluded. It was a typo and I correct it.

Furthermore, I wanted to check with you the position of the car frame. Because in our plan view, we show the car frame on left side but doppler has it on the right side. Which one is the correct?

Moreover, the voice announcer should be in Croatian language or English is also good?

Looking forward for your reply for your best service.

Hello dear Dejan,

Attached you will find the new revised offer **TQ32827 Rev01** with car frame type (L) as you requested and the new plan view of the lift.

As you will see in the drawings the COP is near to the wall so the shaft should be straight. Another solution could be to calculate wall mounted Cop instead of flat column with box on the back.

Please let me know how would you like to proceed for your best service.

Hello dear Dejan,

I wanted to inform you that we received yesterday a payment from your side the amount of **6.000,00 €**.

Will this considered the payment in advance of the order **TQ32843 SB Helipad?**

Looking forward for your reply for your best service.

Hello dear Dejan,

Attached you will find the final drawings and offer for the project **SB Helipad TQ32843**.

Please send them back to me with stamp and signature as confirmation.

I have already ordered the machine in order to not lose valuable time and I need to forward the order into production.

Thanks in advance.

Hi,

Looking from the elevator entrance in the top floor the counterweight is on the right.

Voice announcer should be in Croatian and I am sure MLC has it :)

P.S. What is the estimated delivery time?

Best regards

Hello Dejan,

I checked everything in order to forward your order TQ32843 into production and I need few clarifications in order to not make any mistake.

First of all, I corrected the offer that I have sent you. I added the LOP's which for some reason was excluded. It was a typo and I correct it.

Furthermore, I wanted to check with you the position of the car frame. Because in our plan view, we show the car frame on left side but doppler has it on the right side. Which one is the correct?

Moreover, the voice announcer should be in Croatian language or English is also good?

Looking forward for your reply for your best service.

Hello dear Dejan,

I discussed with our administration in order to speed up the production of the order **TQ32843 Sb helipad**.

We will load the brackets, the guides and we will try to have ready also the car frame next Friday.

I need immediately the manual of the Prolift doors that you bought in order to prepare the controller accordingly.

Moreover, please proceed with the final payment of the order as soon as you are able.

I will send you the information regarding the truck that we will need for next week on Monday.

For any further information, assistance or clarification we are at your disposal.
